Basalt Works!

Sourced from once undersea volcanoes, Basalt heals the earth where the ocean plates separate under pressures almost unimaginable. More than merely a rock, Basalt contains silica, magnesium and iron in a dense and uniquely created blend. Applied to your skin, these elements exhibit healing qualities and leave you soothed and smoothed, without a greasy residue.

Basalt Works formulates all of its products using the fine, all natural residue that results from the crushing of Basalt stones. Basalt Works All Natural Mineral Scrub and Mineral Masque remove dead skin and increase circulation. Basalt Works products also contain extracts that act as an anti-oxidant and help reduce inflammation. You'll feel the difference.

An excellent exfoliant that sloughs off dead skin, Basalt Works All Natural Mineral Scrub leaves a smooth texture without a greasy feel. Perfect for your entire body.

Directions for use: Apply a dime size amount directly on moist skin. Massage gently for about a minute. Rinse with warm water. Pat dry with soft cloth. You cannot over use this product. Not recommended for use on face.

An effective antioxidant, our anti-inflammatory masque with a moisturizing affect, removes impurities from beneath the skin and stimulates circulation. Other ingredients stimulate and activate immune functions. Your skin will feel refreshed and rejuvenated.

Directions for use: Apply a small quantity on your fingertips and massage all over face and neck. Avoid eye area. Let masque set for 10-15 minutes. Apply warm wash cloth to face for about 30 seconds. Gently remove product. Pat dry with soft cloth.
